

Bag holder waste bin for restaurant h809_18

Professional 70-liter bag holder waste bin in stainless steel and polypropylene, with innovative pedal closure for maximum hygiene and odor control.

This professional bag holder waste bin has been specifically designed to meet the rigorous hygiene standards required in industrial kitchens, hotels, and the catering sector. The heart of the system is the automatic closing mechanism: a folding ring controlled by a pedal that seals the bag as soon as the pressure is released. This system ensures that the operator never comes into contact with waste, maintaining maximum aseptic conditions during intense workflows.

The structure combines the strength of stainless steel with the practicality of shock-proof plastic, ensuring long-lasting durability even in humid environments. Thanks to the integrated wheels, movement is smooth, facilitating floor cleaning operations at the end of the shift.

Technical features

- **Dimensions:** W 59 x D 50 x H 98 cm
- **Capacity:** compatible with standard 70-liter bags
- **Mechanism:** automatic folding ring operated via pedal
- **Materials:** load-bearing frame in stainless steel; base and bag holder in resistant polypropylene
- **Mobility:** equipped with 2 rear wheels Ø 80 mm and 2 front support feet
- **Hygiene:** immediate and silent closing system for the containment of miasmas
