

Bag holder waste bin h20_186

Stainless steel waste bin 110 lt, HACCP pedal lid, non-marking wheels. For professional kitchens, hospitals, hotels.

Professional waste bin designed for environments with high hygienic standards such as restaurant kitchens, hotels and hospital facilities. The **stainless steel** structure guarantees hygiene, corrosion resistance and ease of sanitization. The lid is operated by a **wide pedal complying with the HACCP method**, which allows opening without manual contact, reducing contamination risks. The bag retainer elastic keeps the trash bag in a stable position during loading and emptying operations.

Two **non-marking plastic wheels** facilitate moving the bin within the workspace, while the compact and stable design ensures balance even during transport. The product is supplied disassembled to optimize shipping and logistics costs.

Technical features

- Dimensions: L55 × D58 × H97.5 cm
- Capacity: 110 lt
- Material: stainless steel
- Finish: bright
- Weight: 7.9 kg
- Lid with ergonomic pedal
- Bag retainer elastic
- Non-marking plastic wheels (no. 2)
- Supplied disassembled
