

Ball pit for children h999_46

Square ball pit (200x200x45 cm) for children in high-density foam and antibacterial PVC. Safe, bite-proof and certified.

The **ball pit for children h999_46** is a psycho-motor structure designed specifically for use within educational environments dedicated to early childhood. Designed to support educators, psycho-motor therapists, and recreation managers, this pool solves the need to create a completely safe play area, sized to accommodate multiple children at the same time. The robust high-density foam core ensures stability and load-bearing capacity at the edges, while the PVC-coated polyester cover offers a surface that is soft to the touch and structurally bite-proof. Designed in full compliance with European regulations, it ensures a hygienic and protected exploratory experience, preventing bumps or injuries during the socialization and movement activities of little ones.
