

Ball pit for children h999_48

Children's ball pit (300x200x45 cm) in high-density foam and antibacterial PVC. Safe, bite-proof, and EU certified.

The **ball pit for children h999_48** is a large-scale play-motor structure designed for use within early childhood educational environments. Designed to support educators, psychomotricians, and managers of large recreational spaces, this pool addresses the need to create a completely safe and very spacious play area (300 cm long) to accommodate large groups of children. The solid high-density foam core guarantees stability and constant support to the edges, while the antibacterial PVC-coated polyester covering offers a surface that is soft to the touch and structurally bite-proof. Manufactured in full compliance with European regulations, it ensures a hygienic and protected exploratory experience, preventing bumps or injuries during the socialization and movement activities of little ones.
