

Ball pit for nursery school h364_82

Ball pit h364_82 for nursery schools (180x180 cm). Polyurethane foam structure, Class 1 fire-retardant coating and Super-washable fabric. Includes floor mat and cover.

The **h364_82 ball pit** is an essential educational and recreational tool for psychomotor development in nursery schools. The structure solves the need to create a safe and defined play area, being composed of **2 modular elements** that can be anchored together via robust velcro strips, which also facilitate storage. Made of **high-bearing polyurethane foam**, the pit guarantees comfort and support, maintaining its shape even under stress. The **Super-washable fabric** coating is specifically designed for school environments: it is non-toxic, antibacterial, water-repellent, and certified **Class 1 fire-retardant**. The pit comes complete with a bottom mat to isolate children from the floor and a practical cover sheet to maintain the hygiene of the balls when not in use.

Technical characteristics

- **External dimensions:** 180 x 180 x 30 (h) cm
- **Internal dimensions:** 140 x 140 x 30 (h) cm
- **Internal material:** High-bearing polyurethane foam
- **Coating:** Super-washable fabric (phthalate-free, non-toxic, antibacterial)
- **Safety:** Class 1 Fire-retardant (fire safety regulation)
- **Included components:** 2 structural elements, ground mat, cover sheet
- **Recommended capacity:** Approximately 1000 balls (not included)
- **Cleaning:** Resistant to difficult stains (markers, tempera, grease) and can be sanitized with alcohol
