

Preschool ball pit h999_45

Ball pit for preschools (200x150x40 cm) in high-density foam and antibacterial PVC. Safe, soft and certified.

The **preschool ball pit h999_45** is a play-motor skill equipment specifically designed for educational and recreational environments dedicated to early childhood. Developed to meet the needs of educators, psychomotor therapists and managers of nurseries and playrooms, this structure solves the need to create a completely safe and protected play area for little ones. Thanks to the use of a robust high-density foam core and a PVC-coated antibacterial polyester coating, the pit offers a soft-to-the-touch surface structurally designed to resist bites. Conceived in full compliance with European regulations, it guarantees a hygienic and serene play experience, stimulating the child's sensory and motor development.
