

Ball pit h364_87

Modular ball pit in rigid plastic (130x130x30h cm) for nurseries. Interlocking colored polypropylene blocks, easy to disassemble.

The **ball pit h364_87** is a modular pool in rigid plastic designed specifically for children's play activities within nurseries. Made with bright colored polypropylene blocks, it offers a safe and stimulating structure that can be used both for classic ball play and as a soft relaxation area equipped with cushions. This product meets the need of educators for extremely flexible play areas: the perfect interlocking system between blocks allows for intuitive assembly and rapid disassembly, allowing staff to modify the shape of the pit as desired to optimize available space or support different educational dynamics.
