

Bariatric fixed height stretcher h634_21

Hospital stretcher for transporting obese patients. Fixed height. Adjustable backrest. Capacity: 300 kg.

Fixed height emergency stretcher, ideal for use in clinics and hospitals. Specific for the transport of overweight patients. Manageable, stable and able to facilitate patient transport operations to the maximum. Consisting of a **painted steel frame** and **fixed height HPL mattress platform** with two sections. **The platform is complete with a high-density foam mattress with a cover that can be sanitized with antibacterial, antifungal and class 1M fireproof medical-surgical devices. The backrest is adjustable with a gas actuator and is able to ensure a high capacity. The base is equipped with 4 antistatic, swivelling wheels with simultaneous locking via bilateral pedal and with a directional system. The stretcher is also equipped with foldable side rails, shockproof bumpers and 4 ergonomic and folding push handles positioned on the head and foot sides. The structure is completed by a cylinder holder compartment and 4 slots for IV poles (IV pole available as an option).**

Technical features:

- Dimensions: L.190 x W.65 x H.75 cm
- Capacity: 300 kg
- No. 4 stainless antistatic swivelling wheels Ø 200 mm, with simultaneous wheel locking via bilateral pedal and with directional system
- Steel frame
- 2-section HPL mattress platform
- Foldable side rails with wide protection
- Fixed height
- Adjustable backrest 0-70° with gas actuator.
