

Barrier with extension for urban furniture h744_42

Urban furniture barrier in cast iron and galvanized steel, 100x108 cm. Module with decorative spheres for pedestrian delimitation and sidewalk protection.

The **h744_42 urban furniture barrier** is a protection and channeling system designed to ensure safety in public spaces. This solution allows for the precise delimitation of pedestrian paths, cycle paths, and green areas, solving the need for physical separation between vehicular traffic and the city through a robust yet refined design structure.

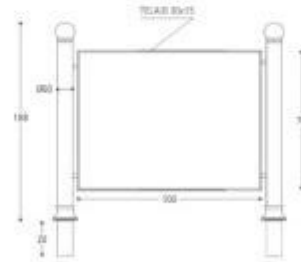

Technical features

- **Vertical structure:** 2 cast iron posts EN GJL 200 (UNI EN 1561) with a diameter of 60 mm.
- **Ornamental elements:** Decorative bases and terminal spheres in cast iron.
- **Central panel:** 30x15 mm tubular steel frame with galvanized sheet metal panel.
- **Protective treatment:** Hot-dip galvanizing for high resistance to atmospheric corrosion.
- **Overall dimensions:** Width 100 cm x Height 108 cm.
- **Panel dimensions:** Specific height of 70 cm.
- **Installation method:** Fixing by direct burial in the ground for 20 cm (ground level "0").
