

Barrier with signaling panel h668_04

Plastic delimitation barrier. With reflective panel. Dimensions: W200 x H102 cm.

Road barrier perfect for use on construction sites, in parking lots and during events, fairs and concerts. Designed for both indoor and outdoor use thanks to its **polyethylene structure** which ensures durability and **weather resistance**. Extremely **lightweight and easy to transport**; the swivel feet allow it to be stacked and minimize bulk. Supplied complete with a **reflective signaling panel** to ensure visibility during night hours.

Technical features:

- Dimensions: W200 x H102 cm
- Material: 100% recyclable polyethylene
- Stackable
- With swivel feet
- With reflective panel
