

Barrier for manhole h109162

Barrier consisting of four identical elements, assembled with interlocking hinges. Red colour. Dimensions: W.100 x h.100 cm.

Barrier for cordoning off a manhole or other type of open hatch on roads and pavements.

The barrier consists of four identical elements, assembled together with **interlocking hinges** that allow cordoning off a closed perimeter for a square-shaped area of approximately 1 sqm.

All parts are painted with **thermosetting polyester powder** suitable for the protection of objects exposed outdoors, with excellent resistance over time to U.V. rays and without any chalking of the film.

Technical features:

- Materials: tubular
- Height: 100 cm
- Width: 100 cm
- Weight: 15 kg
- Colour: red
