

Road closure barrier h109163

Road barrier with a structure consisting of two pairs of heavy-duty legs and a red sign. Dimensions: W.150 cm H. 100 cm.

Mobile barrier for delimiting and signaling closures on roads and sidewalks.

Consisting of two pairs of **heavy-duty legs** support in shaped "U" profile and welded to a horizontal Ø 10 round bar as reinforcement at the base, supporting a shaped sheet metal plate that acts as a sign via interlocking on the upper part. The plate is fixed at the rear with two M8 steel hex head screws.

All parts are galvanized and the plate is painted with **thermosetting polyester powders** in red.

The product is quick and easy to assemble and has a minimal footprint when disassembled.

Technical features:

- Material: sheet metal
- Width: 150 cm
- Height: 100 cm
- Weight: 8.4 Kg
