

Basin stand for clinics h708_30

Professional double basin stand for operating rooms in chromed metal and 18/8 stainless steel. Height 82.5 cm, rotating basins and antistatic wheels.

The basin stand **h708_30** is a medical device designed for the functional set-up of operating rooms, clinics, and sterile environments. The structure is made of high-resistance chromed metal, designed to support two independent 18/8 stainless steel basins, the material of choice to ensure maximum hygiene and resistance to sterilization processes. The unique feature of the two rotating basin system allows healthcare personnel to orient the containers according to the specific needs of the procedure, optimizing ergonomics and maneuverability around the operating table.

Technical features

- **Basin material:** Professional 18/8 stainless steel
- **Supporting structure:** Chromed metal
- **Configuration:** 2 rotating and independent basins
- **Capacity:** 5.5 liters per single basin (total 11 liters)
- **Basin diameter:** 32 cm each
- **Height:** 82.5 cm (fixed configuration)
- **Movement system:** 5-spoke base (Ø 63.5 cm)
- **Wheel specifications:** 1 standard, 2 equipped with a braking system, 2 antistatic
