

Basin stand trolley for clinics h736_05

Basin stand trolley h736_05 in stainless steel with two 6-litre basins and 5-wheel base, ideal for operating rooms and professional medical clinics.

The **basin stand trolley h736_05** is a professional support designed to meet the strict hygienic and functional requirements of healthcare environments. Entirely made of **stainless steel**, this tool facilitates the management of liquids, solutions, and dressing waste such as used gauze, while ensuring quick and effective decontamination between procedures.

The structure is characterized by a five-spoke base that provides high anti-tip stability, a fundamental requirement during emergency operations or in confined spaces. The two included basins are easily removable for emptying and sanitization, making the workflow dynamic and safe for medical personnel.

Technical specifications

- Frame material: **stainless steel** with high resistance
- Equipment: 2 stainless steel basins
- Single basin capacity: **6 litres**
- Basin outer diameter: 32 cm
- Movement system: 5 swivel wheels Ø 75 mm
- Safety: 2 wheels equipped with a pressure braking system
- Resistance: abrasion-resistant wheels resistant to chemical corrosion
- Overall dimensions: 635 x 700 x 865 mm
- Weight: 7 kg
