

Basin stand trolley h708_29

Surgical basin stand in 18/8 stainless steel and chrome-plated metal, height 82.5 cm with 5 multidirectional wheels including 2 antistatic for clinical safety.

The **h708_29 operating room basin stand** is technical equipment designed to support surgical procedures, ensuring maximum hygiene and operational functionality. The structure is designed to facilitate the management of sterile liquids and organic residues within the operating block, offering a stable and safe mobile station.

The system consists of a high-resistance **chrome-plated metal** support and a removable **18/8 stainless steel** basin, the material of choice in the medical field for its anti-corrosive properties and ease of sterilization. The five-spoke base is equipped with differentiated wheels to meet hospital safety regulations, including antistatic and braking components.

Technical features

- **Basin material:** Medical grade 18/8 stainless steel
- **Structure material:** Chrome-plated metal with stability inserts at the base
- **Basin capacity:** 5.5 liters
- **Basin dimensions:** Diameter 32 cm
- **Total height:** 82.5 cm (fixed non-adjustable configuration)
- **Base footprint:** Foot diameter 63.5 cm for anti-tip stability
- **Mobility system:** 5 pivoting casters (1 standard, 2 lockable for parking, 2 antistatic)
- **Functionality:** Rotating basin support for optimal orientation
