

## Battery collection container with ballastable base h32641

Outdoor waste battery collection bin. Capacity 50 liters. Height from the ground approximately 79 cm.

Container for the collection of dead batteries with a **ballastable base** ideal for outdoor use to raise awareness for waste separation.

Made of plastic material with the rotational molding technique; **resistant to impacts, aging, and fading**. The lid is in thermoformed ABS and then colored with the best two-component paints. It is locked to the container by a triangular lock and waste access occurs through holes. Emptying is done using a bag, or via a removable internal container, also built in plastic with the rotational technique.

### Technical features:

- Material: rotational plastic
- For outdoor use
- Capacity: 50 liters
- Height from the ground: 79 cm
- Lid dimensions: 47x32 cm
- Depth: 40 cm
- Base dimensions: approximately 48x42 cm
- Total weight: 7.5 Kg

## INFORMATION

- Capacity 50 lt
