

Bedside table for patient ward thickness 18 mm h776_103

Open bedside table for patient ward with lower drawer, structure thickness 18 mm. Dimensions: W 44 x D 47 x H 55 cm.

The **H776_103 bedside table for hospital patient rooms** is designed to offer functionality and resistance in healthcare contexts. Equipped with an **18 mm panel structure**, it guarantees **solidity and stability**, essential elements for daily use in hospitals, clinics, nursing homes (RSA) or care facilities. The open design allows immediate access to the patient's essential items, while the **drawer positioned at the bottom** allows for an orderly division of space, useful for storing personal effects safely and hygienically.

The **compact dimensions** (W 44 x D 47 x H 55 cm) make it easy to place even in rooms with limited space, without compromising capacity. The lightweight of **14 kg** makes it easy to move for sanitization or room rearrangement. It is available in **various colors**, offering aesthetic flexibility based on the healthcare environment in which it is placed.

This model is intended for **indoor** use, and is ideal for ensuring comfort and practicality for both healthcare workers and patients. No additional accessories or options are provided.

Contact us now to request a tailored quote for healthcare supplies such as the **H776_103 bedside table**! Available in various colors to suit your environment.
