

Bedside table with 18 mm thickness for patient rooms h776_104

Open bedside table for patient rooms with high drawer, 18 mm thick structure. Dimensions: W 44 x D 47 x H 55 cm.

The **H776_104 bedside table for hospital patient rooms** is an essential solution for functional and practical furnishing in healthcare contexts such as hospitals, nursing homes, care homes, and clinics. The structure is made with **18 mm thick panels**, synonymous with solidity, stability, and durability over time, even in environments subject to intensive daily use.

The configuration with an **open compartment in the lower part** and an **integrated top drawer** facilitates both the organization of personal items and accessibility to basic necessities by the patient or healthcare staff. The **compact dimensions** (W 44 x D 47 x H 55 cm) and the low weight of **13 kg** make the bedside table easily movable for cleaning and tidying operations.

The product is intended for **indoor use** and is available in **different color variants**, allowing for aesthetic customization consistent with the hospital environment. The bedside table is supplied **already assembled**, ready to be used without the need for assembly.
