

Bench for public spaces h109_304

Pine wood bench without backrest. Fixing: ground anchoring.

The pine wood bench **without backrest** is ideal for parks, gardens, and paths. The bench consists of bent and contoured supports forming a rectangle. On the base of the supports, there are holes for **ground anchoring**. The seat is made of **autoclave-impregnated pine wood slats** in compliance with DIN 68800-3 standards to protect the wood against fungal attack, mold, and atmospheric agents. All metal parts are galvanized and coated with thermosetting polyester powders. The hardware is made of stainless steel.

Technical Features:

- Material: pine wood and metal
- Dimensions: L. 180 x D. 48.6 x h. 63 cm
- Anchoring: ground anchoring
- Without backrest
- Stainless steel hardware
- Structure color: anthracite
