

Bench for urban furniture in reconstituted stone h338_46

Modular bench in sandblasted reconstituted stone. Dimensions: W 178.5 x D 145.5 x H 50 cm.

The **H338_46 bench for urban furniture** is an urban design element designed for **public spaces, green areas, squares, parks, avenues, pedestrian areas and residential contexts**. Made of **reconstituted stone**, a durable and weather-resistant material, it represents a perfect choice for those who wish to combine **robustness, aesthetics and functionality**.

The **sandblasted sides** give it a textured and natural look, also improving slip resistance. Available in **two elegant finishes** – **white concrete** and **natural grey concrete** – it easily adapts to any architectural context, classic or contemporary.

One of the main strengths of this bench is its **modularity**: it can be used **individually** or in combination with the **planter model H338_45**, creating bespoke modular configurations that enhance the urban space in a coherent and orderly way.

With a **weight of 840 kg**, it is **self-supporting**, stable and safe, ideal even for unsupervised public areas. It does not require complex fixings and is ready for use as soon as it is positioned.

Make your urban spaces more welcoming with the **H338_46 bench**. Order now or request a quote for complete configurations with matching planters.

Technical features:

- **Material:** Reconstituted stone
- **Surface treatment:** Sandblasted sides
- **Available finishes:** White concrete / Natural grey concrete
- **Dimensions:** W 178.5 x D 145.5 x H 50 cm
- **Weight:** 840 kg
- **Installation:** Self-supporting, without fixing
- **Modularity:** Can be combined with the H338_45 model planter
- **Use:** Urban furniture, green areas, public spaces

User benefits:

- **Structure:** solid and stable even without fixing.
- **Design:** elegant with natural finishes.
- **Material:** weather-resistant.
- **Possibility:** of composition with matching planters.
- **No:** ordinary maintenance required.

FAQ:

1. **Does the bench require fixing to the ground?**
No, thanks to its weight and self-supporting structure, it is not necessary to fix it.
2. **In what finishes is it available?**
In white concrete and natural grey concrete, to adapt to different contexts.
3. **Is the surface treated?**
Yes, the sides are sandblasted for a textured and non-slip effect.

4. **Can it be combined with other elements?**

Yes, it is modular with the H338_45 planter to create modular solutions.

5. **Is it suitable for areas with high atmospheric exposure?**

Yes, reconstituted stone is resistant to frost, rain, and prolonged sun.

Short buying guide:

When choosing a bench for public spaces, it is essential to evaluate **durability, safety and aesthetic adaptability**.

The **reconstituted stone** models, such as the H338_46, are perfect for permanent installations, thanks to their **mechanical and weather resistance**.

The high weight makes them **stable and tamper-proof**, without the need for anchoring.

The sandblasted finishes add value and safety, while the **modularity with matching planters** allows for a harmonious and tailored design for every urban space.

Urban stone bench, self-supporting public bench, sandblasted concrete bench, modular bench with planter, resistant bench for public spaces, urban bench in reconstituted stone.
