

Bicycle rack for public spaces h287_199

Bicycle rack in galvanized steel sheet. Ground fixing. Dimensions: 20 x 20 x H.90 cm.

Bicycle rack entirely made of **galvanized steel sheet** shaped with laser technology with a thickness of 60/10, ideal for creating **bicycle parking areas**. Thanks to the **slender** design, the product allows for easy bike securing while occupying **little space**. The rack is equipped with a chain connection.

The galvanized steel parts first undergo a pre-treatment process of **degreasing impurities** through steam solutions, then dried and subjected to **painting** operations using electrostatic guns that cover the pieces with powder paint in a floury state. Subsequently, the product is subjected to polymerization in an oven, a process that allows the powder to solidify by baking at a temperature of **180/200° C** in a hot air circulation oven. The pieces coming out of the oven are **cooled naturally**. The powders used in the painting process are **non-toxic** according to **current regulations**.

Technical characteristics:

- Material: galvanized steel with a thickness of 60/10
- Structure shaped with laser technology
- Distance between the two plates equal to 60 mm
- Oval bottom plate equipped with 2 holes for ground anchoring
- Dimension: 20 x 20 x H.90 cm
- Anchoring: floor level
- With chain connection (chain not included)
- Available in different finishes (on request)

INFORMATION

- **Material** galvanized steel
- **strengths** fisse, ingombro ridotto
- **Typology** al suolo
- **length** 200 mm
- **fixing** tessellation
