

Bicycle rack for public spaces h729_32

Support for 2 bicycles or motorcycles with rubber boomerang protection. Dimensions: W 56 x D 19 x H 80 cm. Modern design.

The **H729_32 bike rack** is a practical and versatile solution for parking bicycles and motorcycles in public spaces such as squares, urban areas, schools, shopping centers and company car parks. Thanks to its **modern and essential design**, it integrates perfectly into any environment, enhancing both aesthetics and functionality.

The structure is made of **Ø 50 mm steel tube** with a thickness of 2 mm, treated with **black painting and rust-proof finish**, guaranteeing high resistance to atmospheric agents and a long service life. To protect the bicycle frames and paint, it is equipped with a special **rubber boomerang**, a detail designed to offer safety and care to users.

Installation is simple and secure thanks to the **fixing plate** with 4 holes (screws not included), ideal for mounting on solid surfaces such as concrete or asphalt. Furthermore, the **removable legs** facilitate transport and management of the product, making it perfect also for temporary situations or evolving spaces.

With a capacity to accommodate **2 bicycles or motorcycles**, this rack is an ideal choice for those who wish to optimize the available space without compromising the stability and safety of the vehicles.

Purchase the **H729_32** bike rack and transform your public spaces into tidy and functional areas. Designed to last over time, it is the perfect solution to meet the needs of modern users who are attentive to the protection of their vehicles. **Order now** and discover the advantages of a professional product. For larger projects, contact us for a customized quote and take advantage of our discounts for multiple orders!

FAQ:

1. **How many bicycles or motorcycles can it accommodate?**
The H729_32 rack is designed to comfortably accommodate 2 bicycles or motorcycles.
2. **Is the product weather-resistant?**
Yes, thanks to the steel structure with rust-proof treatment and resistant black painting, it is ideal for outdoor use.
3. **How is the rack installed?**
Installation takes place via a fixing plate with 4 holes. It is necessary to use screws or anchors (not included) compatible with the type of surface.
4. **Is it easy to move or transport?**
Yes, thanks to the removable legs, the product is easily transportable and manageable in case of relocation or temporary needs.
5. **Is maintenance required?**
Periodic cleaning is sufficient to remove dirt and dust and keep the rack in excellent condition.

Mini purchase guide:

When choosing a rack for bicycles or motorcycles, make sure the product is suitable for your specific needs. If you are looking for a solution for public spaces or urban areas, it is essential to focus on a resistant structure, such as the **rust-proof treated steel** one of the H729_32, designed to last over time.

Another important aspect is the protection of the vehicles: bicycles and motorcycles must be safe from aesthetic damage. The presence of protective elements, such as the **rubber boomerang**, adds value to the product and makes it more practical for users. Finally, consider the ease of installation and the possibility of moving the rack, especially if you will use it in dynamic or temporary spaces.
