

Bicycle rack for urban furniture 5 places h140_403

Bicycle rack for urban furniture in galvanized steel. Dimensions: W.286x D.91xH.86cm

Single-sided bicycle parking rack, 5 places made in **galvanized steel** with **perforated plates** for ground fixing using expansion bolts. The Bicycle Rack is designed in galvanized steel subjected to the best **anti-corrosion treatments** and final coating with thermosetting powder that make the product particularly suitable for **urban furniture** and suitable for exposure to atmospheric agents. The bicycle rack has a stylized structure adopted to furnish **Parks, Shopping Malls** and is useful and practical even near places with **high traffic of people** such as **Stations and Trade Fairs**. The Bicycle rack for urban furniture has a structure composed of n. 2 uprights in galvanized steel round tube ending with perforated plates for fixing to the ground using expansion bolts. Two horizontal crossbars on which n.5 bicycle holder brackets and relative spacer tubes will be inserted. Each bicycle holder includes parallel wheel holder brackets and a bracket placed on the side for the bicycle's attachment to the rack. The wheel holder brackets are staggered in height with a difference of about 15 cm from each other to allow quick and practical attachment. The color of the **Bicycle Rack** as in the photo is gunmetal. Other RAL colors are available on request.

Technical Characteristics:

- Material: galvanized steel
- Dimensions: W.286x D.91xH.86cm
