

Bicycle rack for urban furniture h28776

Spiral bicycle rack for urban furniture in galvanized steel. Ground anchoring. Available in 5, 7, 9 space versions.

The **Bicycle rack with ground anchoring** is a very useful piece of equipment that allows you to create parking areas for bicycles near urban centers, parks, and schools. It is composed of 2 "U"-shaped supports with a height of 42 cm made of round galvanized steel tube, Ø 60 mm complete with a plate for ground anchoring. To prevent atmospheric agents from compromising the stability of the product structure, the internal structure is made of **powder-coated galvanized steel**.

It is possible to purchase it in different sizes:

- 5 spaces: L.195 x D.42 x H.42 cm
- 7 spaces: L.250 x D.42 x H.42 cm
- 9 spaces: L.300 x D.42 x H.42 cm

Technical features:

- Structure: galvanized steel
- Fixing: to be bolted to the ground using plates
- Anthracite grey color
