

Bicycle rack h191_107

Single bicycle rack in galvanized and micaceous grey powder-coated steel, height 85 cm. Essential design for ground fixing via anchor bolts.

The **bicycle rack h191_107** is a single-use support designed to offer a safe and orderly bicycle parking solution in urban and professional contexts. Made of **galvanized and powder-coated steel**, this structure guarantees high resistance to atmospheric agents and corrosion, maintaining a sober aesthetic thanks to the **micaceous grey finish**. The linear design is specifically designed to facilitate the anchoring of the bicycle frame via anti-theft cables, effectively responding to the need for theft prevention in high-traffic areas such as offices, schools and parks. The provision for **ground fixing via anchor bolts** ensures stability and permanence of the installation even in spaces open to the public.

Technical features

- **Material:** galvanized and powder-coated steel
- **Configuration:** single-use module
- **Installation type:** ground fixing to be bolted
- **Color:** micaceous grey
- **Height:** 85 cm
- **Design:** structure optimized for attaching the anti-theft cable to the frame (cable not included)
