

Bicycle rack with canopy for urban furniture h350_98

5-seater bike rack with rain canopy in galvanized tubular steel and polycarbonate. Underground fixing. Available in corten and micaceous grey.

Bicycle rack designed for outdoor environments such as parks, gardens, stations, and schools. The structure combines **galvanized and oven-painted tubular steel** with a **polycarbonate roof** to ensure protection from the elements. The bases equipped with plates allow for **fixing via direct underground burial in the ground**, ensuring structural stability in high-traffic contexts. Available in **two colors: corten and micaceous grey**, to integrate with various urban furniture design choices.

Technical characteristics

- Capacity: 5 bike spaces
- Dimensions: L225 × D175 × H234 cm
- Structure material: galvanized and oven-painted tubular steel
- Cover material: polycarbonate
- Integrated rain canopy
- Fixing system: plates for underground burial in the ground
- Available finishes: corten, micaceous grey
