

Big Bag holder container h332_14

Painted steel Big Bag holder for 1 m³ bags, capacity 1000 kg. Self-supporting dismantlable and movable structure, 100% Made in Italy.

The **h332_14 industrial Big Bag holder container** represents an economical and highly functional technical solution for the safe support of 1 m³ big bags. Designed for industrial, logistical, and temporary storage contexts, this support facilitates the management of bulk materials, ensuring stability and order in workflows. Its **self-supporting** architecture is designed to interface perfectly with common lifting systems, solving the issues related to manual handling of heavy loads.

Technical characteristics

- **Use:** Professional support for Big Bags with 1 m³ capacity
- **Structure:** Self-supporting frame with dismantlable uprights for logistical optimization
- **Material:** High-quality steel with wear-resistant gray painted finish
- **Total dimensions:** 1080 mm (L) x 1190 mm (W) x 1130 mm (H)
- **Internal dimensions:** 980 x 980 mm
- **Maximum capacity:** 1000 kg
- **Empty weight:** 35 kg
- **Handling:** Designed for use with pallet trucks and forklifts
- **Stackability:** Non-stackable structures; stacking allowed only for the bags (if suitable)
- **Warranty:** 3-year structural warranty
- **Production:** Made entirely in Italy (Made in Italy)

The supply is provided in a **dismantled** state to minimize bulk during transport and reduce shipping costs, with a quick and intuitive on-site assembly procedure.
