

Bike Rack for urban furniture 10 spaces h140_402

Bike parking rack in galvanized steel 10 spaces. Dimensions: L. 281x D. 151x H. 86.5cm

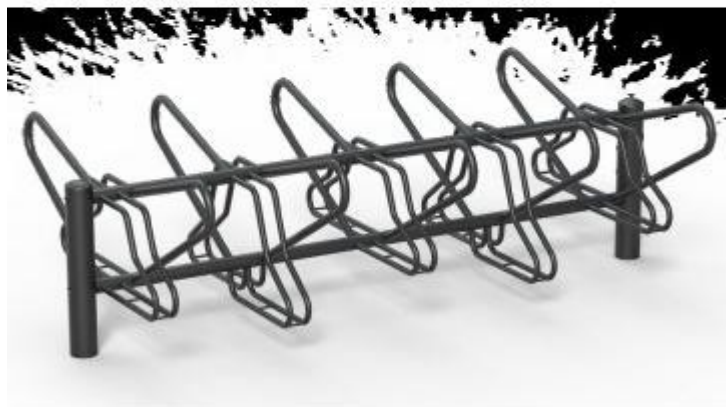

Double-sided bike rack for urban furniture 10 spaces. The rack is made of **galvanized steel**, a particularly **resistant** material and, since this bike rack is specific for urban furniture, it also undergoes various **anti-corrosion treatments and thermosetting powder coating** for further protection against atmospheric agents. The bike rack is therefore ideal for urban furniture in **squares and parks**, convenient near **airports, stations and subways**. The structure of the bike rack consists of 2 support posts in galvanized steel round tube, complete with end caps and prepared for embedding in a concrete base. 2 horizontal crossbars in galvanized steel round tube on which 5 double-sided bike-holding brackets (5+5) will be inserted with relative spacer tubes. Each bike-holding bracket consists of 2 parallel front/back brackets for wheel insertion, wheel stopper and bracket for attaching the bicycle frame to the rack. The fixing of the bike rack for urban furniture is carried out by extending the posts and embedding them in a concrete base. The way this rack is used is **practical and agile** thanks to the available bike stoppers that keep the **bicycle firm and balanced** and an attachment via anti-theft chain at a height that does not involve any particular **physical effort or discomfort**.

Technical Features:

- Material: galvanized steel
- Dimensions: L. 281x D. 151x H. 86.5cm
- Rack: double-sided type
- Spaces: 10
- 2 posts in galvanized steel round tube: Ø 114mm
- 2 horizontal crossbars in galvanized steel round tube Ø 55x2mm
- 5 double-sided bike-holding brackets (5+5)
- 2 galvanized steel round tubes Ø 60x2 mm
- 2 parallel front/back brackets for wheel insertion Ø 25x 1.5mm
- Galvanized steel wheel stopper Ø 10mm
- Bicycle frame attachments in galvanized steel round tube Ø 35x 1.5mm
- Available in different RAL colors
- Ground fixing by extending the posts and embedding them in a concrete base.

INFORMATION

- **Material** galvanized steel
- **strengths** bi-facciali
- **Typology** al suolo
- **length** 2810 mm
- **fixing** grout
- **places** 10
