

Bike rack with 4 sockets and panel h859_24

Bike rack with 4 sockets and graphic panel. Available in various colors. Dimensions: W.1650xD.390x H.1800 mm.

Linear bike rack, ideal for charging and parking bicycles near public squares, accommodation facilities, and shopping centers.

The item allows you to charge your bike for free by simply plugging in your own cable. The product features a **galvanized steel base** with structure uprights and bike racks with a thickness of 2.50 mm and is equipped with 6 pre-drilled holes for ground anchoring and features removable adjustable feet for potential ground fixing. **The rack is equipped with 4 outdoor Schuko sockets** always active with child-proof protective cover and **4 bike stalls** with anti-fall support with three different thicknesses for wheel sizes up to 29" (excluding FatBike).

The graphic panel allows you to add your own logo.
