

Bicycle rack with concrete supports h10913

Painted galvanized steel structure with concrete sides. Available in 5, 7, and 9-seater models. Made in Italy.

The **removable bicycle rack** is suitable for places where it cannot be fixed to the floor with anchors, such as parks, squares, and historic centers.

This bicycle rack consists of round **tubular elements** made of steel with a diameter of 25 mm, appropriately **curved** and rigidly welded to two horizontal round steel tubulars with a diameter of 48 mm.

At the ends of the horizontal tubulars, appropriately perforated flanges are welded for attachment to the lateral **concrete support** walls in sandblasted concrete. All metal parts are **hot-dip galvanized** according to UNI standards and painted with thermosetting polyester powders in various RAL colors.

Technical features:

- **This product is available in 5, 7, and 9-seater versions**
- Dimensions: mm 2280 / 2845 / 3277 x 752 x 420 (W x D x h)
- Distance between supports: 5 cm
- Structure: galvanized steel
- Sides: in concrete
- Fixing: removable
- Weight: 5-seater 205 Kg - 7-seater 212 Kg - 9-seater 217 Kg
- **Made in Italy**

INFORMATION

- **Material** Steel
- **strengths** amovibili con base in cemento, bi-facciali
- **Typology** al suolo
- **fixing** removable
