

Bike rack with concrete bases h33721

Urban furniture bike rack with washed gravel bases and steel structure. Available in 5, 7 and 9-space models.

The **bicycle rack** allows for safe bicycle parking. Ideal for **large cities** wishing to offer their citizens a practical solution that encourages ecological travel.

The upper curvature is a **patented** element to accommodate even bicycles with disc brakes.

At the ends of the horizontal tubes, **double flat brackets** are welded, suitably drilled for fixing to the **concrete** lateral support walls using stainless steel screws hidden under a metal cover. All metal parts are **cold galvanized** and **powder coated**.

Technical features:

- Sides: in concrete
- Structure: in cold galvanized steel
- Finish: anthracite grey
- Upper curvature to accommodate even bicycles with disc brakes
- Available in different models

This bike rack is available in several versions:

- 5 spaces: 2240*700*420 mm
- 7 spaces: 2790*700*420 mm
- 9 spaces: 3240*700*420 mm
