

Black and yellow evacuation chair h567_27

Carrying chair for elderly and disabled with 4 transport handles. Open dimensions: W.710 x D.505 x H.910 mm.

The carrying chair is suitable for transporting patients in places where it is not possible to pass with a stretcher, such as stairs, corridors and elevators. **The product is equipped with 4 handles**, 2 of which are frontal, and is made of lightweight aluminum with a waterproof black nylon sheet. **The automatic safety lock** and the 4 **quick-release belts** for patient immobilization ensure safety and stability. At the base there are 4 wheels, 2 of which are fixed and one equipped with a lock, ensuring stable transport even on smooth terrain.
