

Blood collection chair h634_36

Blood collection chair, day hospital and emergency room with handset for movement management. Capacity: 200 kg.

Chair for hospital and clinic use, suitable for blood collection, blood donations, chemotherapy, dialysis and infusion therapies. Equipped with **2-motor electric movement** allowing **independent and simultaneous adjustment of the backrest and leg rest** and reaching the **10° Trendelenburg position**. Complete with **removable armrests** with rotation function, tiltable up/down, 90° fold-away and whose movement is synchronized with the backrest. The structure features an **anti-tip painted steel frame** and a surface with **fireproof eco-leather upholstery** that is easily washable and disinfectable. The surface is also complete with **2 soft foam cushions**, one for the backrest and seat section and one for the leg section, which ensure a correct, ergonomic and comfortable posture, as well as preventing pressure sores. The base is equipped with **4 wheels** of which the rear ones have a simultaneous brake. All movements can be managed via a **10-button handset**.
