

Blue Big Bag holder frame h332_16

Big Bag support frame h332_16 in painted steel. 1000 kg capacity with pallet, ideal for static filling of 1 m³ bags.

The **Big Bag support frame h332_16** represents an economical and efficient solution for the **static support of 1 cubic meter bags**. Designed for industrial, agricultural, and logistical contexts, this support facilitates manual or mechanical filling operations, offering an essential structure that optimizes workspaces. The frame is supplied **disassembled** to reduce transport bulk, complete with bolts and instructions for quick and intuitive assembly.

The structure is entirely **produced in Italy** and guarantees high quality standards, supported by a **3-year warranty** on the structural part. To ensure maximum stability and reach the nominal capacity, it is necessary to position a **standard pallet** (not included) at the base of the frame. It is important to note that the structure is designed exclusively for static use: once the Big Bag is filled, extraction takes place by manual/mechanical lifting of the bag or by removing a section of the frame to allow the pallet to be slid out.

Technical characteristics

- **Use:** static support for 1 m³ Big Bags
- **Material:** painted steel (blue color)
- **Maximum capacity:** 1000 kg (with the help of a pallet at the base)
- **External dimensions:** 1200 mm (W) x 1100 mm (D) x 1360 mm (H)
- **Empty weight:** 45 kg
- **Assembly:** supplied in a kit to be assembled (bolts included)
- **Handling:** not intended with load inserted
- **Support base:** compatible with standard pallets
- **Production:** 100% Made in Italy
- **Warranty:** 3 years on the structure
