

Blue tipping skip for forklifts h332_17

h332_17 carbon steel tipping skip for forklifts. Capacity 1 m³, load capacity 1000 kg, watertight tank and safe remote emptying. The **h332_17 tipping skip** is a professional solution designed to optimize the collection, handling, and disposal of scraps, waste, and debris in industrial environments. Made of **electrowelded carbon steel** with a blue painted finish, this equipment meets hygiene and safety requirements thanks to its **watertight tank**, which allows for the efficient management of even wet materials or dirty residues without leakage into the work environment.

The design is engineered for maximum logistical integration: the structure is **fully forkable** for use with a forklift, while the **four integrated nylon wheels** allow for easy manual movement for precise positioning at workstations. The discharge system is designed to protect the operator, allowing for **remote-operated emptying** via a release pin, eliminating the need to step off the lifting vehicle.

Technical features

- **Internal capacity:** 1 cubic meter
- **Maximum load capacity:** 1000 kg
- **Material:** Electrowelded carbon steel
- **Finish:** Protective blue paint
- **Total dimensions:** 1245 x 1365 x 1045 (H) mm
- **Internal tank dimensions:** 1200 x 1096 x 850 (H) mm
- **Unladen weight:** 175 kg
- **Discharge system:** Controlled tipping via remote release pin
- **Handling:** Forkable for forklift and maneuverable on 4 nylon wheels
- **Sealing:** Watertight tank for liquids and solids
