Boat gangway h858_75

Folding marine gangway in seawater-resistant aluminum, load capacity 149.7 kg, with non-slip surface and double handrail included.

It is a folding marine gangway in aluminum, designed to facilitate boarding and disembarking from yachts and sailboats, with particular attention to the needs of **people with reduced mobility**.

The high-quality seawater-resistant aluminum structure offers robustness and ease of handling. With a **weight of approximately 18.1 kg and a maximum load capacity of approximately 149.7 kg**, the gangway allows for a stable connection between the vessel and the quay, facilitating boarding operations.

The non-slip surface promotes stability during passage, while the **integrated 10.16 cm diameter wheels** facilitate movement. The gangway is also equipped with an anchoring socket and eyelets prepared for fixing the **double handrail system included in the supply**, which offers additional support points during transit.

Made according to German manufacturing tradition, it is intended for use in the marine environment, with a construction oriented towards resistance, precision, and durability over time.

Technical features

- Type: folding marine gangway
- Intended use: yachts and sailboats
- Expected use: boarding access, even for people with reduced mobility
- Structure material: high-quality aluminum
- Resistance: seawater-resistant construction
- Walking surface: non-slip
- Weight: approx. 18.1 kg
- Maximum load capacity: approx. 149.7 kg
- Wheels: integrated
- Wheel diameter: 10.16 cm
- Equipment: anchoring socket
- Preparation: eyelets for fixing the double handrail
- Handrail: double handrail system included
