

Bobath method therapy table h728_09

Bobath therapy table in steel and fireproof vinyl, 200x120 cm. Double synchronized motorization for millimeter height adjustment.

The **Bobath therapy table** is a professional solution designed specifically for neurological rehabilitation and treatments that require a large support surface. The width of 120 cm allows the therapist to work alongside the patient directly on the work surface, facilitating mobilization maneuvers and proprioceptive exercises. The **epoxy powder-coated steel structure** guarantees maximum structural stability, supported by a system of 4 fixed feet and 4 wheels for logistical movement.

Technical characteristics

- **External dimensions:** L.200 x D.120 x h.50/85 cm
- **Maximum load:** 180 kg
- **Frame:** Steel with epoxy coating, white finish
- **Upholstery:** 100% certified class 1IM fireproof vinyl
- **Padding:** 30 kg/m³ density foam, 5 cm thick
- **Elevation system:** 2 synchronized electric motors with remote control
- **Movement:** Integrated Ø 60 mm wheels for internal movement
- **Certifications:** Device with CE Mark

To preserve the integrity of the upholstery, it is recommended to **avoid the use of alcohol, solvents, ketones or abrasive sponges**. Cleaning must be carried out exclusively with a soft cotton cloth, water and neutral soap, followed by thorough drying.
