

Bobath therapy table h725_08

Electric Bobath table for neurological rehabilitation, 200x120 cm. Steel structure with perimeter bar, 300 kg capacity and fireproof upholstery.

The **professional rehabilitation table** is a specialized tool designed to meet the needs of physiotherapy centers, osteopathy clinics and neurological clinics. Its structure is optimized for the execution of **Bobath and Vojta methods**, offering an extra-wide support surface that guarantees absolute stability during complex mobilization maneuvers. The electric elevation system allows for smooth height adjustment, facilitating access for patients with reduced mobility and optimizing ergonomics for the operator.

Technical features

- **Dimensions:** L.200 x D.120 x h.46/94 cm
- **Height adjustment:** Electric actuator with 8000N thrust force
- **Control system:** Perimeter bar for activation from any side of the table
- **Mobility:** Integrated base with wheels for easy movement
- **Safety:** Safe dynamic working load up to 300 kg (static capacity 400 kg)
- **Upholstery:** Fireproof foam padding and technical fabric, Class IM1 certified
- **Hygiene:** Waterproof surface, resistant to detergents and medical disinfectants
- **Protection:** Reinforced perimeter edge to safeguard the upholstery

Options on request:

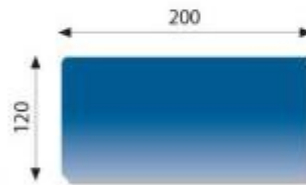

- Customization of the surface color upon request for a quote
