

Bobath therapy table h919_24

Professional medical table for Bobath therapy in steel and synthetic leather, 200x150 cm surface and 270 kg capacity. Ideal for intensive rehabilitation.

The **specific medical table for Bobath therapies** is designed to support rehabilitation professionals during complex neurological maneuvers. Thanks to the extremely wide support surface, the instrument allows the physiotherapist to position themselves directly on the surface together with the patient, ensuring maximum effectiveness in the execution of therapeutic protocols. The structure is engineered to respond to the typical stresses of physiotherapy centers and specialized clinics.

Technical features

- **Structure material:** High-resistance steel
- **Finish:** Corrosion-resistant epoxy coating
- **Maximum capacity:** 270 kg (certified static and dynamic load)
- **Dimensions:** Length 200 cm x Depth 150 cm
- **Fixed height:** 50 cm
- **Padding:** High-density foam for ergonomic support
- **Upholstery:** Washable and sanitizable synthetic leather
