

Bobath therapy table with electric backrest and variable height h725_22

Professional electric Bobath table in steel, width 100 cm, with motorized adjustment and reclining backrest. Ideal for Vojta therapy.

The **Bobath therapy table h725_22** is a specialized instrument designed to meet the rigorous requirements of neurological rehabilitation centers. Its technical configuration supports the application of **Bobath and Vojta** therapeutic protocols, providing an extremely stable and wide work surface that facilitates interaction between therapist and patient, even during maneuvers requiring the physical presence of two operators on the table.

The integration of a **dual electric motor** system allows for precise adjustment of both the platform height and the backrest inclination, reducing the ergonomic fatigue of the professional and ensuring maximum patient comfort at every stage of treatment. Operational safety is a priority, guaranteed by a magnetic key locking system and the use of certified materials for the healthcare environment.

Technical specifications

- **Total dimensions:** L. 2000 x W. 1000 x h. 480 - 900 mm
- **Motorization:** Electric with a thrust force of 6000 N
- **Backrest adjustment:** Electric, with inclination up to 85°
- **Section lengths:** Backrest 550 mm, leg section 1400 mm
- **Safety:** Integrated power cut-off key
- **Materials:** Fireproof upholstery and padding in class IM1
- **Load capacity:** Safe working load 160 kg; Maximum capacity 200 kg
- **Compatibility:** Structural base with clearance for patient lifter passage
- **Certification:** Medical Device compliant with current regulations
