

Body transport stretcher h919_38

Professional stainless steel body transport stretcher with fabric canopy. Stable structure, 20 kg, 150 kg capacity, dimensions 200x60x80 cm. Ideal for hospitals, morgues and funeral services.

The **H919_38 body transport stretcher** is a professional solution for the **transport of bodies** in hospital environments, morgues and funeral facilities. It meets the operational needs of healthcare structures and funeral services, while ensuring respect for the dignity and privacy of the deceased.

The **entirely stainless steel structure** offers **maximum resistance, hygiene and durability**, making it ideal for intensive and repeated use. The **stainless steel side rails** provide stability and safety during transport operations, preventing unwanted movements. The **fabric canopy** allows for the protection and shielding of the body, responding to the professional discretion requirements of these contexts.

Despite its robust construction features, the stretcher maintains a **limited weight of 20 kg**, making it **easy to maneuver and transport** even in limited spaces. The **load capacity of up to 150 kg** ensures wide operational capability. The compact design and **optimal dimensions of 200 x 60 x 80 cm** make it suitable for various professional environments, from hospital corridors to preparation rooms in morgues.

Technical features

- **Structure:** Stainless steel with side rails
- **Canopy:** Resistant fabric for body coverage
- **Dimensions:** W 200 x D 60 x H 80 cm
- **Net weight:** 20 kg
- **Maximum capacity:** 150 kg
- **Finish:** Fixed structure for optimal stability during transport
