

Bollard for public spaces D.76 mm h1047_04

Removable bollard for public spaces h1047_04 in anthracite painted galvanized steel. Post with an increased diameter of 76 mm equipped with automatic closure and a rapid removal system via a triangular key. Height: 100 cm above ground.

The **bollard for public spaces D.76 mm h1047_04** is a professional road delimitation and protection device with high structural resistance, specifically developed for **municipal administrations, public technical offices, employers, urban interior and exterior designers, traffic managers, and corporate safety managers**. This complement responds to the organizational need to regulate traffic flows and safeguard public safety, solving the operational problem of **securing access to pedestrian areas, limited traffic zones, and corporate or public parking lots, while allowing emergency or service vehicles to pass in case of emergency or necessity thanks to a rapid opening and disassembly system of the passage**. Regarding materials, the unit is entirely made of robust galvanized steel with an anthracite painted finish, a metallic treatment that guarantees excellent protection against rust, atmospheric corrosion, and daily wear in urban areas. The post architecture features a fixed external diameter of 76 mm, offering superior visual presence and robustness, and develops a useful height of 100 cm above ground. Operation is based on an integrated mechanism with automatic closure of the station, while removal and unlocking operations occur through the use of a specific triangular key. The stability of the module on the ground is guaranteed by the positioning of a 35 cm deep lower ground socket, included in the supply of the post.

Technical features

- **Product type:** removable traffic bollard for public spaces with emergency release
- **Reference code:** h1047_04
- **Construction material:** galvanized steel
- **Surface protective finish:** anthracite colored paint
- **External diameter of the post (D):** 76 mm (D76mm)
- **Useful height of the structure:** 100 cm above ground
- **Fixing base specifications (Anchoring):** 35 cm deep lower socket to be buried
- **Integrated locking mechanism:** post with automatic closure system
- **Unlocking and removal mechanics:** rapid removal of the metal post executable via triangular key (key not included, available as an optional accessory)
- **Main operational functionality:** allows for quick opening and disassembly of a passage in case of emergency or logistical needs
- **Installation suitability:** public spaces, outdoor areas, pedestrian access, road delimitations, and parking areas

Optional:

- **Triangular key**
