

Bollard for public spaces h319_113

Concrete bollard Ø50x46 cm for urban furniture, equipped with a handling ring and anchoring system for the delimitation of pedestrian areas.

The **urban furniture bollard** represents a solid and durable solution for managing vehicle flows and protecting sensitive areas. Made entirely of **concrete**, this element combines a high structural mass with a functional geometry, making it ideal for installation in public and private contexts where an impassable and permanent physical delimitation is required.

Technical features

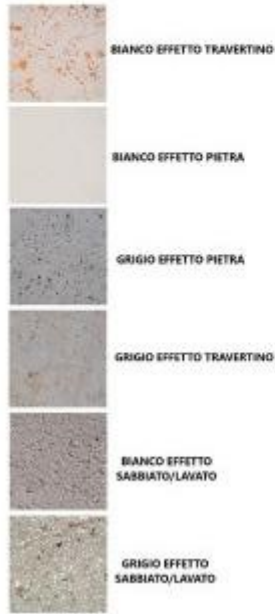

- **Material:** high-resistance concrete
- **Dimensions:** Ø 50 cm x h. 46 cm
- **Weight:** 140 kg
- **Handling:** equipped with a top ring to facilitate lifting and positioning
- **Fixing system:** designed for ground anchoring via a 16 mm bush integrated into the base
- **Finishes:** available in various color and material variants

Installation notes: for correct anchoring, it is necessary to use a threaded rod to be grouted into the subsoil, onto which the bollard bush will be screwed. The threaded rod is not included in the supply.
