

Bollard for public spaces h42434

Rectangular bollard in galvanized and stainless steel, 100x50x1000 mm, for embedding, with customizable tip for modern urban furniture.

Urban furniture bollard designed for the delimitation of pedestrian areas, limited traffic zones, and public spaces. The device combines functionality and design thanks to its **rectangular shape** with a minimal profile, ideal for contemporary architectural contexts. The structure consists of a **galvanized steel body**, a material chosen for its mechanical resistance, topped by a **stainless steel tip** that provides aesthetic durability and allows for customization through the engraving of heraldic coats of

arms or municipal names.
