

Bollard for urban furniture D.60 mm h1047_05

Removable urban furniture bollard h1047_05 in anthracite painted galvanized steel. Post with a diameter of 60 mm equipped with automatic locking and a quick removal system via a triangular key (see optional). Height: 100 cm above ground.

The **bollard for urban furniture D.60 mm h1047_05** is a professional road delimitation and protection device with high structural resistance, developed specifically for **municipal administrations, public technical offices, employers, urban interior and exterior designers, traffic managers, and corporate safety managers**. This complement responds to the organizational need to regulate traffic flows and safeguard public safety, solving the operational problem of **making access to pedestrian areas, limited traffic zones (ZTL), and corporate or public parking lots secure, while simultaneously allowing emergency or service vehicles to pass in case of emergency or necessity thanks to a quick opening and disassembly system of the passage**. Regarding materials, the unit is entirely made of robust galvanized steel with an anthracite painted finish, a metallic treatment that guarantees excellent protection against rust, atmospheric corrosion, and daily wear in urban areas. The architecture of the post provides a fixed external diameter of 60 mm and develops a useful height of 100 cm above ground. Operation is based on an integrated mechanism with automatic locking of the station, while removal and unlocking operations take place through the use of a specific triangular key. The stability of the module on the ground is guaranteed by the positioning of a 35 cm deep lower ground socket, included in the supply of the post.

Technical features

- **Product type:** removable traffic bollard for urban furniture with emergency release
- **Code reference:** h1047_05
- **Construction material:** galvanized steel
- **Surface protective finish:** anthracite color painted
- **External diameter of the post (D):** 60 mm (D60mm)
- **Useful height of the structure:** 100 cm above ground
- **Fixing base specifications (Anchorage):** 35 cm deep lower ground socket
- **Integrated locking mechanism:** post with automatic locking system
- **Unlocking and removal mechanics:** quick removal of the metal post performed via a triangular key (key not included, available as an optional accessory)
- **Main operational functionality:** allows the quick opening and disassembly of a passage in case of emergency or logistical needs
- **Installation suitability:** outdoor areas, pedestrian access, road delimitations, and parking areas

Optional:

- Triangular key
