

Bollard for urban furniture diameter 76 mm h1047_02

Removable bollard for urban furniture h1047_02 in stainless steel. Post with an increased diameter of 76 mm equipped with automatic closure and a rapid removal system via a triangular key (see optional). Height: 100 cm above ground.

The **bollard for urban furniture diameter 76 mm h1047_02** is a professional road delimitation and protection device with high structural resistance, specifically developed for **municipal administrations, public technical offices, employers, indoor and outdoor urban designers, traffic managers, and corporate safety officers**. This complement responds to the organizational need to regulate traffic flows and safeguard public safety, solving the operational problem of **securing access to pedestrian areas, limited traffic zones (ZTL), and corporate or public parking lots, while allowing emergency or service vehicles to pass in case of emergency or necessity thanks to a rapid opening and disassembly system of the passage**. In terms of materials, the unit is entirely made of robust stainless steel, a metal that guarantees maximum mechanical longevity against impacts and total immunity to weather and atmospheric corrosion. The architecture of the post features a fixed external diameter of 76 mm, offering superior visual presence and robustness, and develops a useful height of 100 cm above ground. Operation is based on an integrated mechanism with automatic closure of the station, while removal and unlocking operations occur through the use of a specific triangular key. The stability of the module on the ground is guaranteed by the placement of a 35 cm deep lower ground sleeve, included in the supply of the post.

Technical characteristics

- **Product type:** removable traffic bollard for urban furniture with emergency release
- **Code reference:** h1047_02
- **Construction material:** stainless steel
- **External diameter of the post (D):** 76 mm (D76mm)
- **Useful height of the structure:** 100 cm above ground
- **Fixing base specifications (Anchoring):** 35 cm deep lower ground sleeve to be buried
- **Integrated locking mechanism:** post with automatic closure system
- **Unlocking and removal mechanics:** rapid removal of the metal post via triangular key (key not included in the package, see optional)
- **Main operational functionality:** allows rapid opening and disassembly of a passage in case of emergency or logistical needs
- **Installation suitability:** outdoor areas, pedestrian accesses, road delimitations, and parking areas

Optional:

- Triangular key
