

Bollard with reflective strip h287_160

Galvanized steel traffic bollard diameter 80 mm, with decorative sphere, reflective strip and side rings for attaching chains. Fixed traffic bollard designed for the management of public and private spaces, ideal for preventing vehicle access in pedestrian areas, limited traffic zones or reserved parking spaces. The structure combines functional robustness with a refined aesthetic, suitable for classic and modern urban furniture contexts. The presence of side rings allows for the integration of chains to define impassable perimeters in a modular way, while the reflective strip ensures the necessary passive visibility for road safety.

Technical characteristics

- **Diameter:** 8 cm
- **Total height:** 120 cm
- **Height above ground:** 100 cm
- **Burial depth:** 20 cm
- **Material:** Galvanized steel round tube
- **Top finish:** Decorative steel sphere
- **Equipment:** Side rings for chain and hole cover flange at the base
- **Safety:** Integrated high-visibility reflective strip
- **Fixing:** Designed for direct embedding into the ground or concrete
