

Bollard with side rings h470_25

Concrete bollard with lava stone aggregates, Ø 80 x H 115 cm, equipped with side rings. Robust solution for the delimitation of pedestrian areas.

This **urban furniture bollard** is designed for the delimitation and protection of public spaces, combining high structural resistance with a refined aesthetic. Made of **concrete with lava stone aggregates**, the product offers an impassable physical barrier, ideal for managing traffic flows and protecting pedestrian areas or monuments. The design is enriched by **decorative carvings at the base**, which soften its massive volume, making it suitable even for prestigious architectural contexts.

Technical features
