

Boot dryer h1034_06

Professional vertical electric boot dryer for 5 pairs. Dimensions: W 29 x D 48 x H 200 cm

The **model H1034_06** is a **vertical electric boot and shoe dryer** suitable for **hotels, ski centers, mountain huts, barracks,** and **operational sites** in areas subject to cold and humidity.

Designed for the efficient drying of **up to 5 pairs of boots**, it is ideal for environments where **wall space is limited**, but a professional service is required to keep footwear **dry, sanitized, and preheated**.

Entirely built in **stainless steel**, this boot dryer guarantees **corrosion resistance, durability over time, and maximum hygiene**, even in very humid environments.

The system is equipped with a **standard 230V electric plug**, with an **integrated 24h timer**, allowing simple, safe, and programmable use. The **energy consumption is minimal**, equal to **85W total (17W per pair of shoes)**, making it an **ecological and economical** solution.

The special structure with **continuously bent rounded brackets** ensures **optimal warm air circulation** inside the footwear, facilitating drying down to the toe and **preventing tilts** that would compromise the correct thermal flow.

The model is also suitable for drying **gloves** and **children's shoes**, thus offering superior flexibility of use.

With **over 30 years of experience** in producing drying systems for the professional sector and a **total 10-year warranty**, this model represents a safe, reliable, and long-term choice.

Trust the quality and experience with the **H1034_06 vertical boot dryer**! Contact us now to receive personalized offers dedicated to hotel facilities and operations in mountain environments.

Technical characteristics:

- **Structure:** entirely in stainless steel
- **Capacity:** 5 pairs of shoes or boots
- **Dimensions:** W 29 x D 48 x H 200 cm
- **Power supply:** 230V electric with plug
- **Energy consumption:** 85W total (17W per pair)
- **Timer:** integrated, 24h
- **Mounting:** vertical wall-mounted, delivered ready to use
- **Recommended minimum ambient temperature:** 15°C
- **Maintenance:** not required
- **Warranty:** 10 years total
- **System:** continuous rounded brackets, without pressure points

User benefits:

- **Maximum:** yield in limited vertical spaces.
- **Operation:** simple with integrated timer and plug included.
- **Low:** energy consumption for sustainable use.
- **Suitable:** for every type of footwear, including children's or gloves.

- **10 years:** of total warranty for complete security.

FAQ:

1. **Is the product ready for use or does it need installation?**

It is delivered ready for use, just connect the 230V plug to the socket.

2. **Does it need periodic maintenance?**

No, the system is completely maintenance-free.

3. **Can I also use it for gloves and small footwear?**

Yes, the rounded brackets adapt perfectly to gloves and children's shoes as well.

4. **How much does it consume?**

The consumption is only 85W total, equal to 17W per pair, so it is ideal for prolonged use without impact on energy costs.

5. **What is the recommended ambient temperature for effective use?**

The environment should maintain a minimum temperature of 15°C to ensure the full efficiency of the system.

Mini buying guide:

If you have little space but want to offer your guests always dry and warm shoes, a **vertical** boot dryer is the most suitable choice. The model H1034_06 is designed for professional use, with **minimum footprint**, **maximum energy efficiency**, and **zero maintenance**. The **stainless steel structure**, the **already installed plug**, and the **integrated timer** make it a reliable, practical, and durable tool, perfect for the needs of tourist or operational facilities in the mountains.
