

Boundary bollard with rings h140_350

Galvanized steel bollard with decorative sphere, Ø 19 cm, height 120 cm. Elegant design with chain rings, ideal for historic centers and parks.

The **urban furniture bollard** is a technical solution designed for the delimitation and protection of pedestrian areas, squares, and monumental entrances. Made of **round galvanized steel tube**, the bollard body is distinguished by its top sphere termination and a decorative band with a circular symbol, elements that allow for harmonious integration into contexts of architectural prestige. The structure is completed by **side rings**, designed for attaching the metal chains necessary to define continuous physical barriers.

Resistance to atmospheric agents is guaranteed by specific anti-corrosion treatments, making the product suitable for prolonged exposure in outdoor environments subject to humidity and thermal changes. The anchoring system provides for a **20 cm underground extension**, ensuring permanent stability and high resistance to accidental mechanical stress.

Technical features

- Tube diameter: 19 cm
- Height above ground: 100 cm
- Total height: 120 cm
- Burial depth: 20 cm
- Material: Hot-dip galvanized steel
- Surface finish: Gunmetal
- Equipment: Side rings for chain
- Total weight: 20.5 kg
- Regulatory compliance: UNI EN ISO 9001:2015
- Welding standard: UNI EN ISO 3834-4:2006
- Certification: "Processing Center" certificate compliant with D.M. 14 January 2008
